

Home > Build At Damco

We're looking
for **Builders.**
Doers. Owners.

No resumes. No titles.

Just show us what you
can build

[Accept the Challenge ↗](#)

We hire based on how you think.

Forget the traditional interview process. We want to see your mind at work, solving real problems, making real decisions.

rules.js

```
const rules =  
{  
  "No Resumes",  
  "No Trick Questions",  
  "Real Problems Only"  
};  
  
$
```

Your Task

Pick a real problem you've personally experienced, build or design a solution, and walk us through how you thought about it.

What we mean by a real problem:

How this works?

Choose Your Track

Pick the track that matches the role you're applying for.

Engineers

Tech Leads

01

Pick a Complex Problem

Something that needs a system, not just a script.

Write a design doc. Diagrams, trade-offs, scale considerations.

03

Record a Video

Present your architecture like you're convincing your team.

Your video should cover

The Problem (2 min): What problem did you pick? Why does it matter to you? How did you scope it?

Live Demo (2–3 min): Show it working. Include at least one edge case or failure scenario.

How You Built It (3–4 min): Walk through your code and architecture. Explain the key choices you made and why.

What's Broken (1–2 min): What doesn't work? What would you improve with more time? Be honest.

We're not looking for polish.
We're looking for understanding.

Use AI. Seriously. If it helps you move faster, use it. We care about what you ship, not how you got there.

What Happens After You Submit

Your journey from submission to screening

Step 1/3

Code Review

Usually within 5 business days

Step 2/3

Live Discussion

20 min discussion

Step 3/3

Engineer_Sample Discussion

```
# Track A:
(Engineer
Interview)
{
> Q: Can you add a
small feature while
sharing your
screen?
> Q: Why did you
use X here instead
of Y?
}

$
```

Tech Lead_Sample Discussion

```
# Track B: (Tech
Lead Interview)
{
> Scenario: Client
just added a
requirement. How do
you adapt?
> Scenario: Budget
cut in half. What
gets cut?
}

$
```

What Counts as a Problem?

Some examples here, but bring your own.
We want to see you think.

morning sorting through
WhatsApp groups for important
messages"

→ Build a voice agent that
summarizes your unread
messages

"My parents can
never find the right
government form
online"

→ Build a voice
assistant that
navigates
government
services in Hindi

**Any problem
that is real.
Something
you've
personally
experienced.**

"I forget what I read in books
after a few weeks"

→ Build an agent that quizzes
you on your Kindle highlights

"I never know what to cook with what's in my fridge"

→ Build an agent that suggests recipes from a photo of your
ingredients

"Tracking expenses across UPI apps is a nightmare"

→ Build a voice agent that categorizes spending from
screenshots

What We're Looking For

`engineer.test.ts`

PASS

`src/tests/engineer.test.ts`

[PASS] Problem Identification

Did you pick a real problem?

[PASS] Technical understanding

Did you pick a real problem?

[PASS] Scoping

Did you pick a real problem?

[PASS] Self-Awareness

Did you pick a real problem?

`engineer.test.ts`

PASS

`src/tests/engineer.test.ts`

[PASS] Problem Identification

Did you pick a real problem?

[PASS] Technical understanding

Did you pick a real problem?

[PASS] Self-Awareness

Did you pick a real problem?

How to Submit

Ready to push? Here's your submission command.

submit.sh

```
$ mail -s "Builder Challenge - [Your Name] -  
[Track A or B]" \ hiring@damcogroup.com
```

```
# Required flags (attachments)  
(link) / YouTube (Unlisted)  
(source) / GitHub OR Architecture Doc  
(bio) / 2-3 lines about what you build
```
